

# TJOEP SMALL AND LARGE

## Timeless design

With the Tjoep, Fatboy gives the classic fluorescent lamp a modern twist. What does it still have in common with its predecessor? That's clearly its recognizable tube shape. And thus also its name, which is a phonetic interpretation of the word 'tube'. Although the Tjoep has a sleek, timeless design, it's full of functionality and hidden ingenuity. So, no more flickering, harsh and unflattering light, but always exactly the kind of light your home needs.

## Full of ingenuity

The Tjoep is the ideal lighting solution for any location and situation indoors. Easily attach the Tjoep to the wall in your hall or bedroom with the included mounting brackets. Hang it from the ceiling above your dining table, workbench or desk with the steel cables and ceiling mounting set. Or place it in a corner in your living room standing on its own. The great thing about the Tjoep? You decide where the light from this LED lamp ends up by changing the direction of the light, using the big rotary knob at the end. And, at the other end of the Tjoep there is a button that allows you to adjust the color and brightness of the light. By pressing and holding the button, you can easily adjust the light from cool white light for work to warm yellow light for dinner. Whether you want indirect warm mood light, or bright white light aimed precisely at your workspace: with the Tjoep you can go in any direction.

## Small or large?

With its robust and inviting appearance, the Tjoep brings coziness to any place indoors. This dimmable and adjustable LED tube lamp is available in two sizes: a 'Small' version that's 50 centimeters long and a 'Large' version that's 150 centimeters long. In addition, it's also available in different colors, so you'll always find a Tjoep that matches your interior.
