

STRIPE SOL

Fatboy's big fat parasols make staying in the shade fun

Come rain or come shine, big parasols make life better. When the sun gives you too much heat or light, then Stripesol is the ultimate device to create a shade just where you want it. Thanks to a diameter of three-and-half meters and a variety of great colours, you are set for a cool spot in style.

Practical to its very tip

Stripesol is a parasol that literally stands strong. The entire device is one to adore. A kingsize garden umbrella, simple to handle with a system as ingenious as strong. Just pull the typical Fatboy-red chord and the Stripesol unfolds, ready to stand firm and proud like a colourful landmark in your garden or patio. Noteworthy detail: the little flag on top whistles where the wind blows.

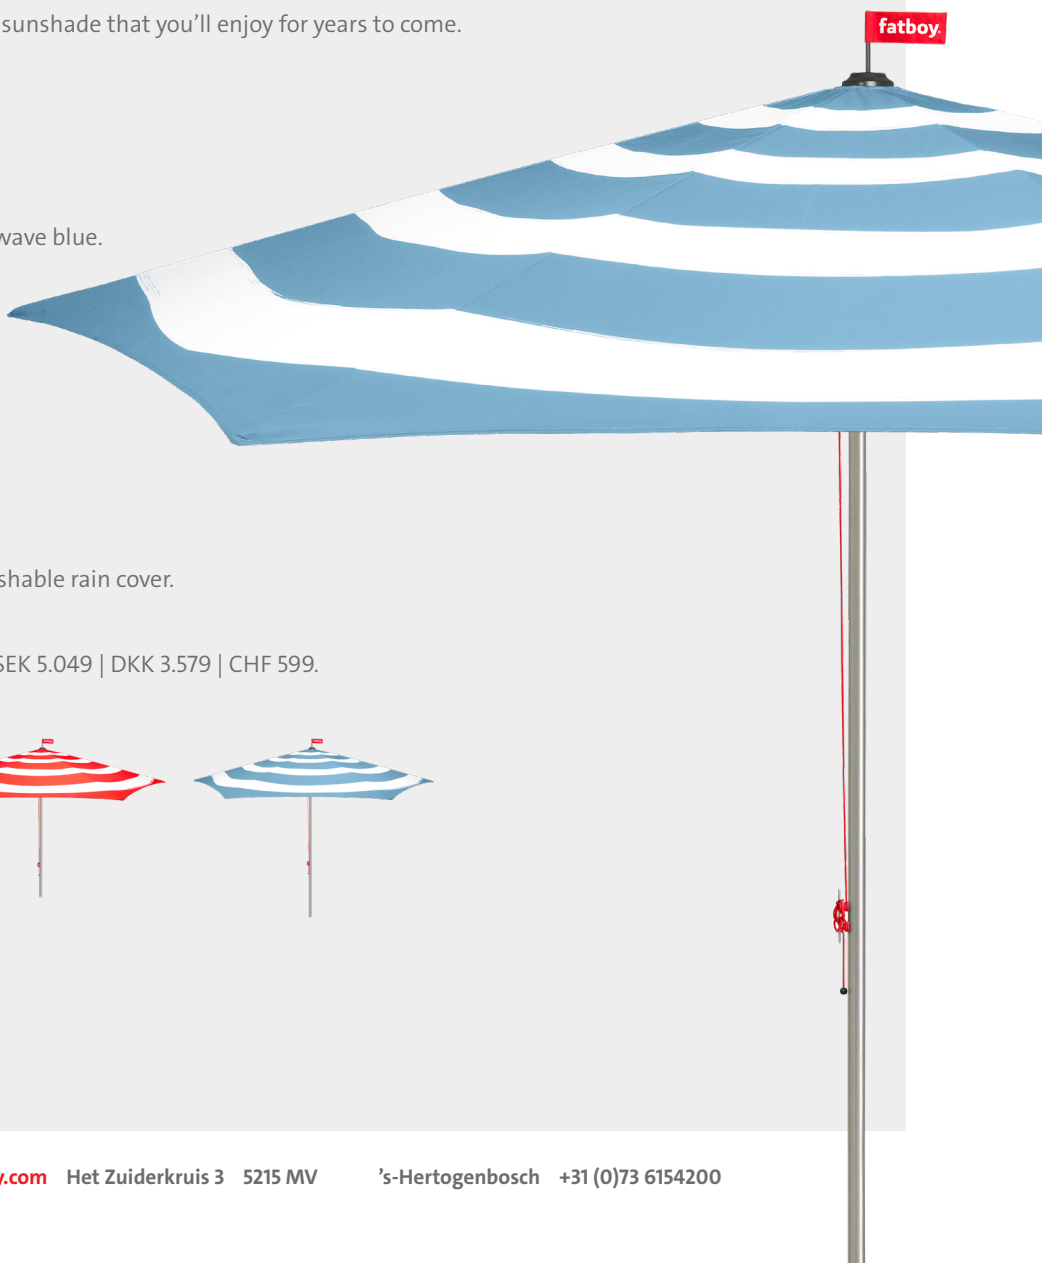

Set it up!

Whether you place it in your garden or on a sunny balcony, the Stripesol parasol from Fatboy stays securely in place. Its sturdy aluminum frame is built to withstand some wear and tear and fits perfectly into the specially designed Fatboy parasol base (sold separately). With the Stripesol, you're getting more than just a parasol—you're adding a statement piece and a sunshade that you'll enjoy for years to come.

Set it up and enjoy your Stripesol!
