

CONCRETE SEAT

A classic building block to sit on.

Here's the story

Concrete seat is a multifunctional stool shaped after and inspired by 'good old' concrete building blocks.

Use it anyway you like; mix and match with one of the beautiful pillows, turn it into a table or create a bench by connecting two of more Concrete seats together. Use Concrete seat exactly how you like it! This stylish seat is suitable for both indoor and outdoor use. Concrete seat is lightweight, but you can fill it with sand or water for added weight and extra robustness.

A sustainable step

Fatboy feels responsible for the impact it has on the planet and future generations. Fatboy is working to improve its ecological footprint. This means sustainable innovation and incorporating it in the materials used. Concrete seat is available in different colors, although Fatboy's favorites are definitely the black, dark ocean and forest ones as these are made of fully recycled materials.
