

CARPRETTY CATWALK

Catwalk on your balcony

What truly completes your outdoor space? A rug. However, outdoor rugs are often too large for smaller city balconies. That's why Fatboy created Carpretty Catwalk, a designer rug that brings indoor ambiance to the outdoors and is specially designed for balconies. At 80 by 200 centimeters, Carpretty Catwalk fits perfectly anywhere.

Water- and weather-resistant

Carpretty Catwalk is UV-resistant, ensuring it retains its colors year after year. Additionally, it's antistatic, super sturdy, and water- and weather-resistant. Spilled something during an outdoor brunch or gathering? No worries, Carpretty Catwalk is easy to clean. A damp cloth or a high-pressure hose, and your balcony rug is as good as new.

Design statement

With Carpretty Catwalk, you make a design statement on your balcony. The sturdy material has a robust appearance while feeling soft under your feet. The rug features a high-low effect weave, which gives this rug a rich, luxurious look. You'll prefer having the rug inside during fall or winter. Because, truth be told, it'll look pretty good in your hallway or study too.
