

PLACEMASTER

Placemaster

Make your table festive with the practical Placemaster. And by practical, Fatboy really means practical. This silicone placemat ticks all the boxes: it's non-slip, heat-resistant, food-safe, and – as a bonus – it can be washed in the dishwasher.

Breakfast or hot soup?

Placemaster's square section is perfect for your plate – whether it's breakfast, a generously sized pizza plate, or a hot soup bowl. The half-round side? Well, that's the ideal spot for your clean (or used) cutlery. The color of the square section perfectly complements the contrasting color of the adjacent half-round.

Fun in function

Placemaster always comes in a set of two identical pieces, allowing you to get creative with your table arrangement. Put the square sides together to create an elongated shape, providing the perfect space for serving appetizers in small dishes or placing hot pans for an elaborate dinner. Placemaster adds both function and fun to your table.
