

HOTSPOT COLLECTION

Hottest hangout

Why go inside when the weather is cooling down? And why would you ever get off that couch again? With Hotspot, every place in and around your home becomes the hottest hangout. Gaze endlessly at the stars, or chat until you've said it all. With this stylish electric heating pad, you turn on the good life anywhere, for as long and warmly as you want.

Super soft

Hotspot Pillow Line Velvet has a super-soft velvet cover made from recycled polyester. The cover has subtle recessed lines, created by applying a heat press technique. Hotspot Pillow invites you to lean back. The red Fatboy label on the side reveals its true purpose: you can use it to control the settings on this rechargeable electric cushion. Hotspot Pillow combines style, warmth and convenience. And of course, the cover can be washed.
