

# FRED'S COLLECTION

When you see Fred's Table's wide slats, you'll instantly recognize its inspiration: the classic picnic table. Fatboy reinvented this icon with a twist. Sturdy yet lightweight, modern, and at the same time so robust that it's easy to imagine Fred Flintstone and his family seated around it. Add the Fred's Chair or Armchair bistro chairs to create the perfect garden hangout. And if you're strapped for space, Fred's Bistreau – a round bistro table – is ready to help you out. Fred's entire collection is made from robust, weatherproof aluminum, designed for many years of outdoor fun.

## Fred's Chair and Armchair

Fred's Chair and Armchair are a perfect match for Fred's Table and Bistreau. Their sleek design in aluminum is a contemporary nod to the traditional slat-back chair. The seat on these bistro chairs is rounded like a cushion, making them extra comfortable. The smile-shaped opening ensures that rainwater can easily run off the seat, so you don't need to wipe the chair dry every time it rains. Choose the minimal look of Fred's Chair without armrests, or choose Fred's Armchair for added comfort. Both aluminum outdoor chairs stack easily. Fred has thought of absolutely everything. Looking for even more comfort? Add Fred's Chair Pillow. Because it slides over the front of the seat with a sleeve, this cushion appears to be an integral part of the chair.

## Fred's Table and Bistro

Fred's Table is the collection's large centrepiece. And we literally mean 'large'; this table's a massive 2.20 metres long and 1 metre wide. Fred's Table easily seats six people. The tabletop slats look solid but are made from special aluminum profiles, which means that they're mostly hollow. This makes the table super sturdy yet light enough to lift. The round aluminum legs keep this 6-seater outdoor table firmly on the ground – and compact in your garden shed during the winter. Simply fold the legs under the table. Would you rather leave him outside? No problem – Fred's Table is a weatherproof outdoor table. If you have a rooftop terrace, small garden, or balcony, Fred's Bistreau is your new best friend. This table is just as iconic as Fred's Table, with its wide aluminum slats and ample nod to the classic French bistro table. The heavy cast-iron base keeps this round bistro table firmly on the ground. Clever detail: the adjustable legs under the table ensure that your outdoor bistro table always stays level on even the most uneven surfaces. Fred's Bistreau invites you to enjoy plenty of outdoor fun.
