

BUBBLE CARPET

This large designer rug breathes new life into any indoor space.

Here's the story

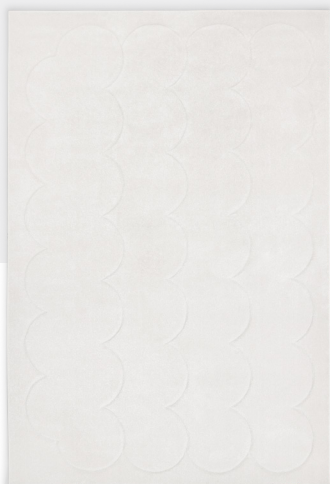

With Bubble Carpet, Fatboy breathes new life into your living room. The soft, hand-sheared, bubble shapes in the rug have been created to add a bit of playfulness to your home. The pattern is bold and round, so that this rug literally and figuratively brings a touch of softness to smooth, solid floors.

Bubble Carpet is designed with an eye for style and subtlety, and works effortlessly with Fatboy's indoor collection thanks to its soft, neutral colors. The visual effect of the different pile heights is like an optical massage for your feet.

Fatboy goes big with Bubble Carpet, because this soft rug is a generous 200 by 290 centimeters. With its ample surface area, Bubble Carpet is the perfect designer rug for the living room or bedroom.
